

Industrial plants

Engineering & Construction

HSE Srl

operates as General Contractor and coordinates a group of companies with extensive experience in the field of industrial plant engineering.

HSE Srl

provides integrated solutions including feasibility studies, business plans, detailed engineering, construction, project management, commissioning, supervision and management of industrial plants.

INDUSTRIAL AND ENVIRONMENTAL ENGINEERING

- Industrial and environmental Engineering and Consulting
- Design of Industrial plant for fluids
- Engineering and consultancy on waste water and primary water treatment
- Project management
- Energy efficiency
- Fire Safety Engineering
- Industrial Plants Supervision and Management;
- Training.

Industrial plants and water treatment

HSE Srl

based on its consolidated experience in mechanical engineering is qualified to provide:

- Construction of complete industrial plants, including prefab and mobile;
- Expansion and changes to industrial processes;
- Metallic Carpentry Structures both in stainless steel and in carbon steel;
- Construction of waste water, industrial water or primary water treatment plants;
- Construction in workshop of customer's own design based equipment;
- Supply, Maintenance and Repair of Machines and Equipment;

HSE Srl

also carries out pre-assembly in equipped workshop with the aim of optimizing on-site operations.

Electrical and automation systems

HSE Srl

operates in the field of electrical plant engineering and industrial automation, providing:

- Design and Implementation of Remote Control and Remote Management Systems;
- Programming of PLC and HMI systems;
- Automation;
- Technical supervision of industrial processes and plant engineering;
- Industrial Process Monitoring and Control;
- Construction of Switchboards and Automation Systems in fixed, including prefab and mobile plants;
- Supply, Maintenance and Repair of Machines and Equipment.

HSE Srl

also produces pre-assembly of plants, electrical panels and automation systems in equipped workshop with the aim of optimizing on site operations.
